WILFRED NJEUNWI TAGHA

Kigali, Rwanda | +237 653 843 785 | taghawilfred@gmail.com | LinkedIn | GitHub

Information Technology graduate student and software engineer with experience building data products, mobile applications, reporting automation and open-source integrations. Combines backend and frontend development with practical data analysis, technical communication and community leadership.

EDUCATION

Carnegie Mellon University Africa 2026 - Present
Master of Science in Information Technology | Kigali, Rwanda

University of Buea December 2024
Bachelor of Engineering in Software Engineering | Buea, Cameroon

PROFESSIONAL EXPERIENCE

Mr Dayter January 2022 - Present
Data Analyst
- Analyze undergraduate and postgraduate research data across health, engineering, socioeconomic and political subjects using Python, SQL, SPSS, Excel, Tableau and Power BI.

CDR Elite Writers January 2024 - July 2026
Website Manager
- Researched, developed and optimized high-volume content, contributing to a 20% increase in site visits through keyword targeting, regular updates and promotion.
- Designed automated MailerLite campaigns that reduced request response time from hours to seconds.

Orange Cameroon July 2024 - November 2024
Mobile Developer Intern
- Worked with a development team on CLADIAQ, an information system for monitoring air quality and providing recommendations for healthier living spaces.
- Built the mobile application used to display data collected from connected sensor devices.

UWACO July 2023 - February 2024
Software Engineer | Mobile Development Team
- Restructured and cached application code, improving application speed and user experience by 10%.
- Added web and SMS communication so users could interact with automobile devices both online and offline.

SYNDATECH June 2022 - July 2023
Data Scientist
- Built a Python data-cleaning and restructuring workflow that reduced report preparation time by 80%.
- Developed interactive Tableau dashboards that made operational data easier to examine and use in decisions.

SELECTED PROJECTS

MicroPowerManager WhatsApp Business Gateway October 2026

Open-source contribution | Laravel, Vue.js, MySQL, Meta WhatsApp Cloud API

- Built a WhatsApp gateway for a decentralized utility management platform, including approved-template notifications, customer opt-in and opt-out, inbound webhooks, delivery and read receipts, message logs and SMS fallback.

  github.com/tagha-wilfred/micropowermanager/tree/feat/whatsapp-plugin

CLADIAQ July 2024 - August 2024

Air-quality information system | AWS, Django, Flutter

- Designed and implemented a system for collecting, storing and displaying air-quality data, with personalized recommendations and predictions.

Fingerprint-Based School Voting System January 2024 - July 2024

Final-year engineering project

- Designed and implemented a biometric voting system to improve voter verification and election administration.

Crop Illness Detection November 2024

Machine learning and mobile simulation

- Built a plant-disease detection model and a mobile simulation for crop-health monitoring.

TECHNICAL SKILLS

Data and analytics: Python, SQL, SPSS, Excel, Tableau, Power BI

Software development: PHP, Laravel, JavaScript, React, Vue.js, Django, Java, C/C++, Dart, Flutter

Platforms and tools: MySQL, AWS, Git, HTML, CSS, Bootstrap, Figma, Canva

Languages: English (fluent), French (basic)

LEADERSHIP AND RECOGNITION

Leadership and service: Scholar and Mentor, Open Dreams (2017 - Present); Core Team Member, Ingressive for Good (2022 - 2024); Regional Coordinator, Edumail (2017 - 2022); Assistant Computer Teacher, Oxford Comprehensive High School (2019); Radio Presenter, CBC Radio Bamenda (2017 - 2020).

Certifications: Programming for Data Science, Udacity; Data Analytics, Udacity; Public Speaking, Youth World Organization; Leadership, CBC and Leadersource Cameroon.

Awards: Second Prize, Analytics Knowledge Quest; Fourth Prize, Orange Summer Challenge; Duke of Edinburgh International Award, Bronze and Silver; Best Computer Science Student, OCHS 2018/2019.
